REF**

The diagram consists of three concentric circles. The outermost circle is magenta, the middle one is grey, and the innermost one is also grey. There are seven blue circular markers with white centers. One marker is located at the top of the magenta circle, slightly to the left. The other six markers are arranged in a hexagonal pattern on the grey circles: one on the top of the middle grey circle, one on the top of the inner grey circle, one on the bottom of the inner grey circle, one on the bottom of the middle grey circle, one on the left of the middle grey circle, and one on the right of the middle grey circle.
