

Diagram illustrating a data structure layout, likely a memory block or file format, showing a sequence of blocks and a reference pointer.

The diagram is divided into two main sections:

- Left Section (TerminalBlock\_RND\_205):** A long horizontal bar representing a sequence of blocks. The text "TerminalBlock\_RND\_205" is followed by a series of 15 circular icons, each containing a blue circle with a diagonal line through it, indicating a sequence of blocks or a pointer chain.
- Right Section (REF\*\*):** A vertical bar representing a reference pointer. It contains a series of 15 small rectangular boxes, each containing a blue circle with a diagonal line through it, indicating a sequence of references or pointers.

The diagram shows a connection between the two sections, suggesting that the sequence of blocks in the left section is linked to the sequence of references in the right section.
