

The diagram illustrates a PLCC-84 package, which is a square integrated circuit with pins on all four sides. A notch is located at the top center of the package. The pins are represented by small vertical bars along the edges. The text "PLCC-84" is written in the center of the package, with "REF" and "D" written below it. The word "Socket" is written to the right of the package. The package is shown within a square frame with a yellow border.
